CORRELATION WITH LITERACY OF STATE

THERE IS A MODERATE POSITIVE **CORRELATION** BETWEEN THE **LITERACY PERCENTAGE** OF A STATE AND THE **VOTER TURNOUT PERCENTAGE**, WITH A CORRELATION COEFFICIENT OF **0.377450**. THIS SUGGESTS THAT HIGHER LITERACY RATES IN A STATE ARE ASSOCIATED WITH HIGHER VOTER TURNOUT RATIOS

RECOMMENDATIONS

- 1). THE ELECTION COMMISSION SHOULD SCHEDULE **ELECTIONS DURING SEASONS WITH MODERATE TEMPERATURES**. THIS WILL LIKELY **ENCOURAGE HIGHER VOTER TURNOUT**, AS MORE INDIVIDUALS WILL BE COMFORTABLE AND WILLING TO PARTICIPATE IN THE VOTING PROCESS.
- 2). THE ELECTION COMMISSION SHOULD ALLOW VOTERS TO **CAST THEIR BALLOTS FROM DIFFERENT CITIES AND STATES FOR THEIR RESPECTIVE CONSTITUENCIES**. MANY INDIVIDUALS MIGRATE TEMPORARILY FOR WORK OR EDUCATION, AND THIS PROVISION WOULD ENSURE THEY CAN PARTICIPATE IN THE ELECTORAL PROCESS.
- 3). THE ELECTION COMMISSION SHOULD TRANSITION TO **ADVANCED DIGITAL TECHNOLOGIES, ENABLING CITIZENS TO VOTE FROM THEIR DEVICES SUCH AS MOBILE PHONES AND DESKTOP COMPUTERS THROUGH SECURE APPLICATIONS UTILIZING BLOCKCHAIN TECHNOLOGY AND OTHER ROBUST SECURITY MEASURES**. THIS MODERNIZATION WOULD ENHANCE ACCESSIBILITY AND EFFICIENCY IN THE ELECTORAL PROCESS WHILE ENSURING THE INTEGRITY AND CONFIDENTIALITY OF VOTES.
